Installation Instructions for the OPTUS D1 Bracket on a 90cm dish for the BBC World and Freeview Package

Mount the LNB Bracket from the second ring from the front of the offset scalar ring, you should mount the LNB back as far as possible in the LNB holder for optimal reception. Once the LNB is mounted you can use a sat finder or the set top box (select the 12483MHz H Pol SR:22500 TP) to optimize the position of the LNB by rotating the offset scalar ring.
