## Installation Instructions for adding services to FreeTV+.

You will need to have firmware version **1.09.35** or higher installed on your X-9200HD or 900HD.

Download the addons you would like to add to FreeTV+ and extract them to a blank memory stick. A file containing new services for FreeTV+ (FreeTV+Services.zip) can be found at <http://www.freeviewshop.co.nz/downloads> You should extract them to your memory stick.

Press Menu on your remote control and navigate to Utilities > FreeTV+ and press OK.

Insert the memory stick with the addons on it into the front panel USB connector on your Ultraplus X-9200HD or 900HD. You will see the following message.

Press the < button to select Yes and then Press OK.

Press OK again to confirm you need to restart Free TV+

After restarting when you press the Green button to select the service you will have the services you have just installed available.
